Presbyterian Turquoise Care Formulary (Shared Preferred Drug List)

About the Formulary

Presbyterian Turquoise Care wants to make it as simple as possible for you to get the drugs you need. The formulary, or preferred drug list (PDL), helps you and your provider choose safe, effective, and affordable drugs. Beginning July 1, 2026, the New Mexico Health Care Authority (HCA) is starting a statewide shared PDL. This statewide list aims to make it easier to get drugs and ensure the same rules apply across all Medicaid health plans. It will also simplify prescribing for providers.

Some drugs are part of this statewide shared PDL. All Medicaid health plans in New Mexico must follow the same rules for those drug classes. HCA reviews and updates these classes over time. You can find the most current shared PDL drug classes on the HCA website: https://www.hca.nm.gov/preferred-drug-list/.

For drugs that are not part of the shared PDL, our clinical experts review medical evidence to help decide which drugs are covered. Their goal is to make sure you have access to treatments that work.

This document explains how your drug coverage works. It tells you what to do if you need a drug that is not on the PDL. We're here to help you get the care you need to stay healthy.

What is a formulary?

A formulary (also called a PDL) is a list of approved prescription drugs that Presbyterian Turquoise Care will cover. The primary purpose of the formulary is to encourage the use of safe, effective and most affordable drugs. Our formulary is "selectively closed." This means that Presbyterian Turquoise Care usually only covers the drugs on the list. The formulary includes notes and limits to your coverage. Examples of limits to the coverage of drugs include quantity limits, step therapy, prior authorization, and specialty pharmacy network restrictions for specialty pharmaceuticals (specialty drugs). On this formulary you will also see the preferred and non-preferred drugs on the state PDL.

Pharmacy & Therapeutics (P&T) Committee

Presbyterian Turquoise Care takes care to make sure your prescription drugs are safe and effective. A team of pharmacists and physicians meet every three months to review the formulary (preferred drug list). Some of these team members are Presbyterian Turquoise Care employees. Others are from the community. The team is called the Pharmacy and Therapeutics Committee. The team looks at new drugs. They also look at new uses for existing drugs. If the drug proves to be safe and effective compared to existing drugs used to treat the same medical condition, they add it to the drug list. The team may decide that the drug can be used only to treat certain health problems. These restrictions are noted on the list. Experimental drugs are never added to the list. The team also looks at drugs already on the list. Sometimes a new drug can be a better treatment for a health problem than an older drug. In this case, the team may take the older drug off the list. Also, if two drugs are equally safe and effective, the more costly drug may be taken off the list.

If Your Drug Is Not on the Formulary (Drug List)

We want you to have the right prescription drugs, even if these prescription drugs are not on our drug list. You may need a drug that is not on the drug list. Or you may need a drug that is not approved to treat your condition. In these cases, a request can be made to make an exception to the drug list. We will look at your request. We may give authorization if we decide that the non-formulary or non-preferred drug is needed. We usually give approval for two reasons:

Such services are funded in part with the State of New Mexico.

1. Your provider finds that a similar drug on our list is not as effective in improving your health
2. Your provider finds that a similar drug on our list could be harmful to your health

What is Prior Authorization (PA)?
Presbyterian Turquoise Care must approve some prescription drugs before you fill a prescription. If you don't get a PA, we may not pay for the drug. You or your provider can ask for PA by fax, phone, or email.

What is Step Therapy (ST)?
You must first try certain drugs to treat a health problem before a different drug will be covered for the same health problem. For example, if Drug A and Drug B both treat your medical health problem, Presbyterian Turquoise Care may not cover Drug B unless you try Drug A first. If Drug A does not work for you, the plan may then cover Drug B.

What are Quantity Limits (QL)?
A quantity limit is a limit to the amount of drug we will pay for in a period of time. We use medical guidelines and U.S. Food and Drug Administration (FDA)-approved recommendations from drug makers to set these quantity limits.

What is Non-Extended Day Supply (NEDS)?
Some formulary drugs have a limit on the day-supply allowed. Drugs with a Non-Extended Day Supply indicator are limited to a 30-day supply.

What are Specialty Pharmaceuticals (SP)?
"Specialty Pharmaceuticals," or specialty drugs, are drugs that are often used to treat complex chronic, rare diseases and/or life-threatening medical health problems. Most SP require a diagnosis validation. They must also be provided through the specialty pharmacy network. SP are not available through the mail-order option and are limited to a 30-day supply.

Generic Drugs
Most of the drugs on the Presbyterian Turquoise Care drug list are generic. A generic drug is approved by the FDA, has the same active ingredient as the brand-name drug, and works the same way in your body. Generics cost less and are usually the first choice for treatment.

Presbyterian Turquoise Care covers the first-line generic drug in each group of similar drugs. However, there are times when the statewide shared PDL (created by the HCA) lists a brand-name drug as preferred. When this happens, you will receive the brand-name drugs, even if a generic exists.

About this Formulary
- This is not a full list.
- It does not give a promise of coverage (payment by your insurance).
- Coverage for some drugs listed may be only for certain dosage forms and/or strengths.
- Drugs that are not in the formulary or drugs that are non-preferred will **not** be covered unless you have tried all of the formulary drugs first and your provider has written that they do not work.
- Drugs that come from living sources (biologic) may be substituted by drugs considered clinically similar in build and use (biosimilar) or by FDA-approved brand drugs marketed without the brand on their label (authorized brand alternatives).

Non-Covered (Excluded) Services
Certain classes of drugs are excluded from coverage and cannot be covered such as:
- Drugs used for weight loss and weight control
- Drugs used to treat sexual dysfunction

- Drugs used to treat infertility
- Drugs used to treat hair loss
- Drugs used to treat cosmetic conditions
- Certain compounded drug items
- Cough and cold drugs for members under the age of 4
- Drugs considered experimental and investigational
- Drugs determined through the Drug Efficacy Study Implementation (DESI) proceedings to be Less Than Effective (LTE)
- Antitubercular drugs available through the New Mexico Department of Health or the U.S. Public Health Service
- Compounded drug items that lack an FDA-approved active ingredient
- Compounded drug items whose active ingredients do not have an assigned NDC or are not FDA-approved for human use
- Over-the-counter items not included in the PDL or determined not medically necessary
- Non-prescription drugs for members residing in nursing facilities (NF) or ICF-IID unless ordered by the attending provider and included in the member's approved plan of care
- Personal care items such as non-prescription shampoos or soaps
- Drug items for a MAP-eligible recipient who is eligible for Medicare Part D when the drug item or class of drug meets the federal definition of a Medicare Part D covered drug
- Drugs not participating in the Medicaid Drug Rebate Program, unless the Medical Assistance Division has determine otherwise

Definition of Status

Icon	Status	Definition
F Formulary	Formulary	A drug covered on formulary by Presbyterian
NPD	HCA Non-Preferred Drug	Generally, a drug chosen by the state to not be covered on the formulary
PDL	HCA Preferred Drug	A drug chosen by the state to be covered on the formulary.
OTC	HCA over-the-counter drug	A drug the state chooses to cover that does not need a prescription to purchase.
OTC Over the Counter	Over-the-Counter Drug	A formulary drug Presbyterian covers that does not need a prescription.
MB Medical Benefit	Medical Benefit	A medical drug given in office by a provider.
ME Medical Exception	Medical Exception	A medical drug that is not on the Plan's Formulary

Icon	Status	Definition
	Benefit Exclusion	Benefit Exclusion is a service or drug that is not covered under the New Mexico Medicaid program
	Non-Formulary	A drug Not Covered on Formulary.
	Oncology Drug	A drug used to treat cancer.

Definition of Restrictions

Icon	Restriction	Definition
	Age Restriction	A coverage limit based on minimum or maximum age of the member in order to ensure safety and effectiveness of treatments and drug dosages.
	Quantity Limit	A limit on how much you can of a drug.
	Limited Distribution	A special drug that can only be filled at certain pharmacies.
	Non-Extended Day Supply	This drug is limited to a one-month (30 day) supply.
	Prior Authorization	Prior Authorization is a clinical evaluation process to determine if the requested health care service is medically necessary, a covered benefit, and if it is being delivered in the most appropriate healthcare setting.
	Quantity Limit	A limit to the amount of drug Presbyterian Turquoise Care will pay for in a period of time. Presbyterian uses medical guidelines and FDA-approved recommendations from drug makers to set these quantity limits.
	Schedule II Max Day	Schedule II drug and max day supply.
	Specialty Pharmacy	Most Specialty Pharmaceuticals require Prior Authorization and must be obtained through the specialty pharmacy network. Specialty Pharmaceuticals are often high cost, typically greater than $600 for up to a 30-day supply. Specialty Pharmaceuticals are not available through the retail or mail order option and are limited to a 30-day supply. Certain Specialty Pharmaceuticals are limited to an initial fill up to a 15-day supply to ensure patients can tolerate the new medication.
	Step Therapy	Step Therapy promotes the appropriate use of equally effective but lower-cost formulary drugs first. With this program, prior use of one or more “prerequisite” drugs is required before a Step-Therapy medication will be covered. Prerequisite drugs are FDA-approved and
