

New Mexico Medicaid Provider Types and Taxonomy Codes

Reference Guide

Introduction

Providers who have multiple provider types associated with their National Provider Identifier (NPI) number are required to submit claims using the correct taxonomy code that corresponds with the specific provider type for the services that they are billing. Providers may use this reference guide to view the taxonomy codes that the New Mexico Health Care Authority (HCA) assigned to each provider type.

How to Navigate this Document

Here are three strategies to help providers find the taxonomy codes associated with their provider type within this guide:

- Review the table of contents and click on their provider type
- Press the CTRL key and the F key at the same time and search for their provider type, provider description or taxonomy code
- Scroll through each page of the guide until the information needed is located

Contact Us

If providers have any questions or need assistance, then they may contact their Provider Network Operations relationship team. Their contact information can be found at www.phs.org/ContactGuide.
