**Subject:** Home Testing Kits for Kidney Health Evaluation + HbA1c Screenings

Dear Provider,

At Presbyterian Health Plan, Inc. and Presbyterian Insurance Company, Inc. (Presbyterian), helping our members get and stay healthy is a primary goal. When it comes to staying up to date on important screenings, we are constantly developing fresh and innovative methods to save time and reduce travel for members. **This year, we are offering members home testing kits for Kidney Health Evaluation + HbA1c screenings.**

The at-home Kidney Health Evaluation + HbA1c test kit has been offered to members who have not completed this screening within the recommended period based on age and medical claims data. By increasing the convenience of this test and removing barriers, there are more ways for members to get the care they need, when they need it.

If the member(s) completes the testing and returns the kit to the lab for analysis, both you and your patient(s) will receive the lab results from LetsGetChecked. The letter to your patient(s) will include a note telling your patient(s) to contact you to discuss those results. LetsGetChecked is an independent healthcare technology company that helps our members take proactive steps in getting important health tests. There is no extra cost for this test for either you or our members.

**If you have any questions, please contact Presbyterian Performance Improvement at (505) 923-2074, Monday through Friday, 8 a.m. to 4:30 p.m.**

As always, thank you for continuing to partner with us to improve the health and wellness of the patients, members and communities we serve.
