The Specialty Care Pharmacy at Presbyterian can provide medications for patients who have serious, chronic, or rare health conditions such as hepatitis, multiple sclerosis, cancer, or immune disorders. The pharmacy is designed to help save these patients money and stress in getting their medications.

Specialty medications can help you manage your condition. Depending on your health condition, these types of medications may:

- Be given by infusion (IV), through injection, or taken by mouth
- Cost more than traditional medications
- Have special storage and handling requirements
- Need to be taken on a very strict schedule

Our team can provide you with the information, support, and tools you need to understand your treatment and manage your condition. We will:

- Go over medication dosages and schedules with you
- Discuss how to manage any side effects you may have
- Help you stay on track with your treatment
- Make sure you are taking your medication safely and effectively
- Help you understand proper treatment guidelines for your condition

Most prescriptions will be mailed to your home. We are available to answer any questions you may have.

The Specialty Care Pharmacy has a clinical pharmacist available 24/7 by phone. Call (505) 823-8800 or 1 (855) 775-7737 if you have any questions about your prescriptions.

Presbyterian Medical Group is a department of Presbyterian Hospital.

Some services may use independent community healthcare providers.
