PREVENTION OF UNHEALTHY SUBSTANCE USE

Presbyterian Healthcare Services is committed to addressing unhealthy substance use. In the last two years we have established the Integrated Addictions Medicine Consult Team with Peer Support Specialists, the Opioid Stewardship Initiative, provided education and training available to the wider community on addiction/pain medicine and Mental Health First Aid, and strengthened community partnerships.

The Bernalillo County Opioid Accountability Initiative works at the systems level to create a change in how we as a community address the opioid overdose epidemic in these areas: treatment, prevention, harm reduction, and criminal justice. This initiative has expanded access and availability of naloxone, helped to coordinate the Bernalillo County Resource and Re-Entry Center, and increase home visiting for positive youth development.

Positive Experiences + Positive Relationships + Positive Environments = Positive Youth Development

Presbyterian Center for Community Health supports a number of local programs that provide leadership, mentorship, and experiential education for youth. Twenty seven youth were sponsored for leadership development through three organizations that lead institutes, internship, and other programs.

PARTNERING FOR A HEALTHIER BERNALILLO COUNTY

Health Council Support

In 2018, as part of our system-wide strategy to build local leadership and capacity, Presbyterian has provided \$40,000 of support to the Bernalillo County Community Health Council to conduct activities that align with our community health plans and address priority health needs in their community including coordination of the Opioid Accountability Initiative and convening for Community Violence Prevention. District Attorney Raul Torrez spoke to more than 150 attendees at the November summit that addressed community violence including ACEs, gun violence, gender-based violence, and suicide.

Healthy Neighborhoods Albuquerque

Healthy Neighborhoods Albuquerque (HNA) includes eight anchor institutions –Presbyterian Healthcare Services, Central New Mexico Community College, The University of New Mexico Health Sciences Center (UNM HSC), Albuquerque Public Schools, First Choice Community

Healthcare, the City of Albuquerque, Bernalillo County and the Albuquerque Community Foundation - committed to developing partnerships and collaborative projects that leverage anchor institutions' capacities to buy local and hire local, as well as promote business development in under-invested neighborhoods. In 2018, Presbyterian took the lead to convene HNA partners for a sustainable food system Action Lab.

Day of Service

For the last six years, the Day of Service has been one way that our leaders give back to the community. This year, over 430 Presbyterian leaders served the community at a local food pantry, Homework Diner, Governor Bent Elementary Fun Run, Habitat for Humanity, Roadrunner Food Bank, Presbyterian's Food Pharmacy, and the Healthy Here Mobile Farmer's Market.

CENTER FOR COMMUNITY HEALTH – LEVERAGING FEDERAL FUNDS FOR NEW MEXICO

Racial and Ethnic Approaches to Community Health (REACH) \$3.9 Million over 5 years

Funded again by the Centers for Disease Control and Prevention, Presbyterian is the backbone agency in the Collective Impact initiative made up of over 20 partners called "Healthy Here." Healthy Here increases access to healthy food through partnerships with local farms and nonprofit organizations, active living through working with local coalitions to increase access to opportunities to live actively and safely, and clinics to connect to community resources.

Bernalillo County Accountable Health Communities (BC-AHC) \$4.5 Million over 5 years

Having good health is difficult when health-related social needs go unaddressed. The BC-AHC project- a partnership between Presbyterian, UNM HSC, and the health council- with more than 10 community partners, screens Medicaid and Medicare beneficiaries for housing, food insecurity, personal safety, utilities, and transportation. Skilled Community Health Workers aid the care team to address needs.
