Subject: Presbyterian Centennial Care and Commercial Products No Longer Cover Enbrel Products

Dear Provider:

Thank you for your continued partnership with Presbyterian Health Plan Inc. and Presbyterian Insurance Company, Inc. (Presbyterian). As a Presbyterian contracted provider, we recognize the importance of your contribution to the health of our members, your patients. In the spirit of collaboration, and to serve our members better, we want to inform providers that Presbyterian changed the formulary coverage of Enbrel (etanercept) products on the its drug formularies.

Effective June 1, 2020: Presbyterian Centennial Care and commercial products no longer cover Enbrel products. Please note, members currently using Enbrel are allowed to continue therapy; however, Presbyterian will not allow members to start Enbrel unless clinical justification is provided (e.g., contraindications to formulary alternatives).

Enbrel is Food and Drug Administration-approved to treat ankylosing spondylitis, juvenile idiopathic arthritis, plaque psoriasis, psoriatic arthritis and rheumatoid arthritis. The attached charts show other targeted immunologic products that are covered on these drug formularies.

We value your input. If you have any questions or concerns, please use the information below to contact the Presbyterian Pharmacy Services department. Thank you for partnering with us to improve the health of the patients, members, and communities we serve.

Presbyterian Pharmacy Services Department
