Subject: Depression Diagnosis and Treatment Webinar

Presbyterian Health Plan, Inc. and Presbyterian Insurance Company, Inc. (Presbyterian) are committed to informing providers about resources that will help improve the care of our members. We use a variety of tools to expand access to effective and high-quality healthcare practices. One of the best ways we educate providers on best practices is through our webinar trainings.

Presbyterian offers webinar trainings throughout the year that focus on specific health topics. We are now offering our Depression Management webinar to providers who prescribe antidepressants and/or diagnose depression for Centennial Care members. The webinar is a 15-minute prerecorded video on depression and covers background, screenings, assessment and treatment. The Depression Management webinar is available through September 2019. Providers who watch the video will receive a \$25 Amazon.com gift card.

If you would like to register for our Depression Management webinar, please visit our website at www.phs.org/providertraining and click on the link for the Depression Management webinar. Once you complete the webinar, you will receive an email from Presbyterian. Please provide your mailing address, and we will mail you the Amazon.com gift card. The gift card may take up to four weeks to arrive. This incentive is available to you and up to four other providers in your office who prescribe antidepressants and/or diagnose depression for Centennial Care members.

Please note that the Depression Management webinar is a prerecorded video, and you will not have the option to ask questions during the video. If you have questions, please email Lindsey Campos at lcamos4@phs.org.

As always, thank you for partnering with us to improve the health of the patients, members and communities we serve.
